ALKALOID CHEMICAL FACTORY AT TISZAPALKONYA

1. The building operation started in the spring of 1955. It was planned that part production should begin in 1958/59 and production at full capacity by 1963.
2. The factory covers an area 1400 metres long and 930 metres wide (not 1400 metres x 1030 metres as originally reported). Consequently the adjoining site reserved for later development measures 600 metres x 930 metres.
3. A high-tension overhead line is built over the area as far as the river TISZA (see sketch).
4. The pillars for supporting the natural-gas pipes are 2 metres high. The pipe will go underground only at the point reaching the factory site proper. The pipeline is to be laid in the direction of MATESZALKA.
5. Within the factory site, various plants will be built for producing sulphuric acid, sodium, polyvinyl chloride etc.
